

TUNDRA ENVIRONMENTS - TOPIC OVERVIEW

Use the scaffold below to create a brief summary of the tundra environments investigative study.

	McDonald and Heard Islands, AUSTRALIA	Churchill, CANADA
	BIOPHYSICAL PROCESSES	
Describe the biophysical processes that occur in tundra environments.		
Explain how the biophysical processes enable tundra environments to function.		
	CAUSES, EXTENT & CONSEQUENCES OF CHANGE	
Examine the causes and extent of change to tundra environments.		
Analyse the short and long-term consequences of environmental change.		
	MANAGEMENT OF ENVIRONMENTAL CHANGE	
Describe management strategies implemented to protect tundra environments.		
Discuss the factors influencing the management responses eg worldviews, competing demands, technology, climate change		

Compare and evaluate the effectiveness of the management responses in achieving environmental sustainability.		
Propose how individuals could contribute to achieving environmental sustainability for tundra environments.
